contextual.io

2 weeks · $10,000 fixed

Two weeks to an AI blueprint *you own.*

Launchpad is a two-week design engagement with our delivery team. You get a complete blueprint for an AI system built around one of your operations, with the business case and running costs worked out. Build it with us, your own team, or anyone else.

YOUR BLUEPRINT INCLUDES

PRD
What the system does, for whom, and how success is measured.

UI/UX approach
The screens and surfaces your team will use.

Agentic architecture
The agents, what each one does, and how they work together.

Integration plan
The systems it connects to, and what's needed from each.

UAT plan
The tests that prove it works before it goes live.

BUSINESS CASE
ROI model
Time and cost saved, set against what it costs to run.

RUNNING COSTS
AI fee estimate
Expected monthly AI usage at your volumes.

NEXT STEP
Fixed-fee build quote
What it costs for Contextual to build it, if you choose to.

HOW IT WORKS

Week 1 · Discover
Working sessions with your team to map the operation, the data and the systems involved.

Week 2 · Design
Our delivery team designs the solution, models the ROI and costs, and walks you through the Blueprint.

WHY TEAMS START HERE

- A clear yes or no on AI for one operation, in two weeks
- Designed by the team that would build and run it
- The Blueprint is yours, with no obligation to build with us

WHAT WE NEED FROM YOU

- One decision-maker and one subject-matter expert
- Two or three working sessions in week 1
- Sample data and access to documentation
- A readout session at the end of week 2

Design	Launch	Operate
Launchpad: two weeks to your Blueprint	Rapid Launch: one Use Case to production on a fixed fee	Managed AI: we run and improve it with you

Start with one operation.
